

**INNER WIRE & CABLE**

932 N. SHILOH ROAD GARLAND, TX 75042

## **Business Recycling Program**

We are excited to share information about Pinner Wire & Cable's new recycling program. The program can help us keep our recyclables out of the landfill, contributing to a reduction of greenhouse gas emissions. It also complies with regional bylaws that require recyclable materials do not enter the landfill.

-Our recycling area is located in rear of our Garland Texas facility.

### **-What's included in our recycling program:**

- Paper: Newspaper, catalogues and magazines, mixed paper (flyers, envelopes and office paper), shredded paper, telephone books.
- Cardboard and Boxboard
- Plastic containers with the recycling symbols 1-7, except polystyrene foam
- Food cans and foil
- Glass jars and bottles
- Refundable beverage containers
- Plastic bags and clear plastic film

- We also recycle the following materials that must be placed in separate bins. These bins are clearly labelled.

- Scrap metal (i.e. fixtures and fittings, sheeting, automotive parts, metal plumbing, and racks)
- Untreated wood (i.e. dimensional lumber, wooden pallets)

**Why is it important to recycle?**

It has been found that landfills contain a significant amount of paper and other recyclable materials, most of which come from business and multi-family buildings. Recycling provides many benefits to our environment.

**Conserve natural resources:** Recycling reduces the need to extract resources such as timber, water, and minerals for new products.

**For the Economy:** Increases economic security by tapping a domestic source of materials and saves energy.

**For our Communities:** Supports American manufacturing and conserves valuable resources. Helps create jobs in the recycling and manufacturing industries in the United States.

By recycling our materials, we create a healthier planet for ourselves and future generations.
